

DocuMental

Ground-breaking solution for better mental health

DocuMental is the first company bringing digital technologies (clinical decision support system, e-triage platform and digital phenotyping tool) to everyday practice and transforming mental healthcare. Due to unique solution, based on international standards, DocuMental is covering whole mental health area and closing gap in needs for better access, quality and cost-effectiveness of support.

For patients: DocuMental app to provide self-assessment, quick support and follow-up via digital assistance.

For healthcare providers (primary care and psychiatry): clinical decision support system to assist teams in diagnostic assessment, treatment management and medical records

For employers: online clinic to early identify mental problems and prevent working related burden via digital interventions.

For students: educational demo to improve clinical and digital skills in mental health

DocuMental roadmap

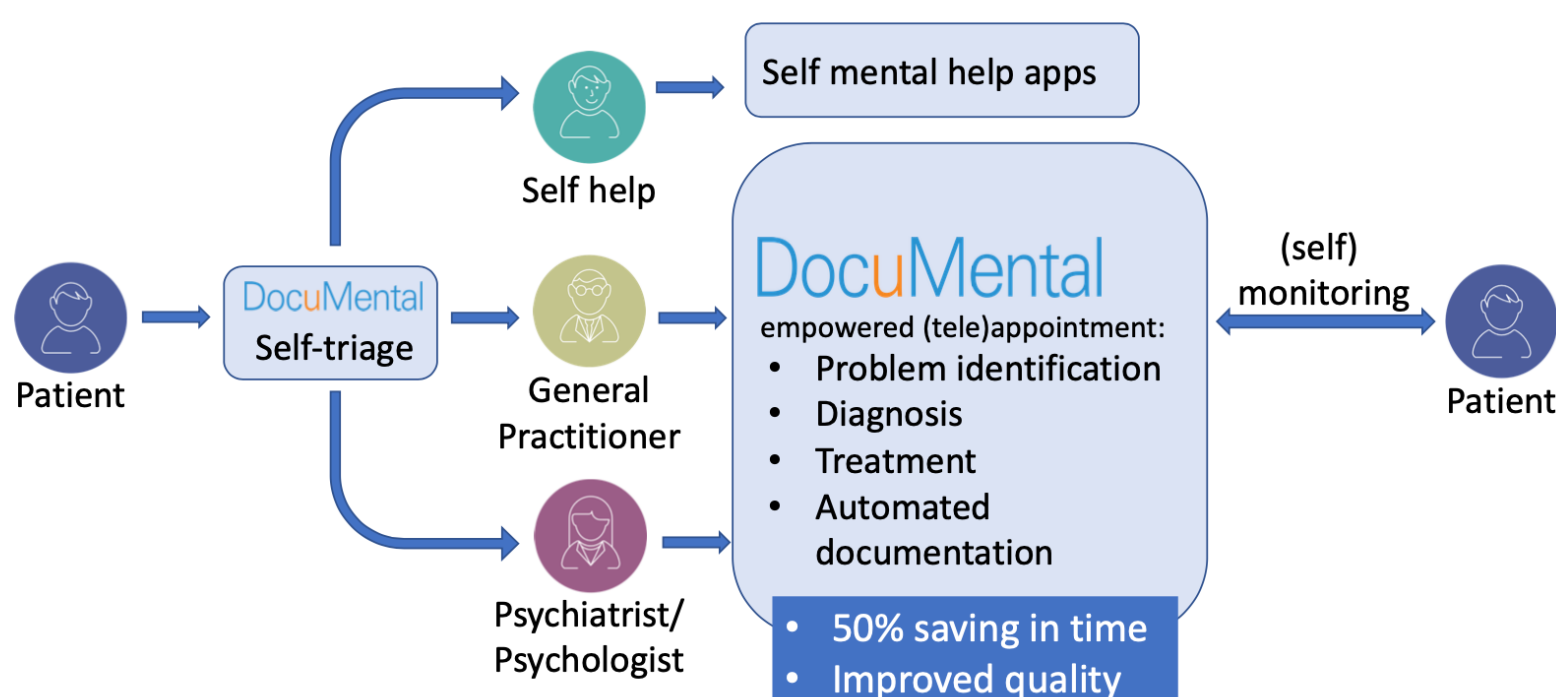

- MVP validated with high-level professional network in 15+ countries
- Since 2016 €0,5M raised through non-dilutable grants
- EU-PEARL €25M project network partner, 13 global big pharma (Janssen, Pfizer, AstraZeneca, Novartis, etc.)
- Large scale implementation with health care providers started

We transform mental healthcare into digital and personalised by:

- 1) Developing new technologies improving diagnosis, treatment and prevention of mental problems
- 2) Establishing network between patients and healthcare providers
- 3) Delivering immediate support via www.documentalcare.com clinic

A tool that brings a patient to a right level mental health professional help
